

Stravilink ICH-S Datasheet

Stravilink ICH-S is an **isolation ceiling hanger with springs** designed to support suspended ceiling systems, optimizing sound insulation between vertically stacked rooms.

BENEFITS

- Quick and easy to install
- 1 inch (25 mm) deflection at design load (resonance frequency of 3.1 Hz)
- Minimum 70% travel from design deflection to overload condition for all spring types
- Different mounting methods possible
- Rubber gasket prevents the rod from short-circuiting with the frame
- Visual cue integrated in the frame to indicate overload conditions of the spring
- Clearance provided so rod can swing 30° without coming into contact with the bushing and reducing efficiency

Visual cue on frame for overloaded condition.

To specify the Stravilink ICH-S spring type our engineers will need the following information:

- The weight and construction of the supported ceiling including all elements supported by the ceiling/hanger
- The required void between the supporting structure and the suspended ceiling

PHYSICAL & MECHANICAL PROPERTIES

Model	Length (A)		Height (B)		Width (C)		Design Load		Load Range		Spring Color
	inch	mm	inch	mm	inch	mm	lbs	N	lbs	N	
ICH-S-12	2.1	54	4.6	116	3.8	98	12	55	6-20	25-80	Light Ivory
ICH-S-18	2.1	54	4.6	116	3.8	98	18	80	9-25	40-120	Pastel Green
ICH-S-24	2.1	54	4.6	116	3.8	98	24	105	12-35	50-160	Light Green
ICH-S-30	2.1	54	4.6	116	3.8	98	30	135	15-45	70-200	Grey Beige
ICH-S-40	2.1	54	4.6	116	3.8	98	40	180	20-60	90-265	Light Blue
ICH-S-50	2.1	54	4.6	116	3.8	98	50	220	25-75	110-330	Pearl Violet
ICH-S-75	2.1	54	4.6	116	3.8	98	75	335	35-110	165-500	Heather Violet
ICH-S-100	2.1	54	4.6	116	3.8	98	100	445	50-150	225-665	Purple Red

Notes:

(1) all springs have minimum additional travel to solid equal to 70% of design deflection.

(2) Maximum Capacity of Structural Assembly = 180 lbs (Factor of Safety Included).

SPRING PERFORMANCE

Relationship between deflection and resonance frequency

Relationship between deflection and resonance frequency

Relationship between deflection and resonance frequency

ICH-S-12 ICH-S-18 ICH-S-24 ICH-S-30 ICH-S-40 ICH-S-50 ICH-S-75 ICH-S-100

The resonance frequency of a Stravilink ICH-S hanger can be determined by its load. To start the calculation use the graph "deflection as function of load" this will provide the deflection at the specified load. Then moving horizontally to the right hand side plot "deflection as function of frequency" on which the corresponding resonance frequency can be found. As an example, the resonance frequency of a ICH-S-18 loaded with 89 N (20 lbs) is determined. The corresponding deflection is 28 mm (1.1"). The resonance frequency of a spring at 28 mm (1.1") deflection is 3 Hz.

EXTRAS

Precompression

1. Precompression of spring to desired load
2. Connector for threaded rod

Rivet Nut

1. Internal 3/8" thread to directly screw the hanger onto the 3/8" rod

Channel Adaptor Clip

1. Cold-rolled channel clip: available with hole size $\varnothing$ 0.39" or $\varnothing$ 0.53" for 3/8" or 1/2" diameter rod respectively

Perimeter Strip

1. Perimeter Strip to isolate the ceiling from the adjacent walls.

TYPICAL ASSEMBLIES

Suspended from ceiling

Directly fixed to ceiling

Suspended from ceiling with wire

Suspended from ceiling (precompressed)

- 1. Wall
- 2. Perimeter Strip
- 3. Structural slab

- 4. Stravilink ICH-S
- 5. Suspended ceiling

Test Setup

1. 150 mm (6") precast concrete slab
2. Stravilink ICH spring hangers
3. 19 mm x 38 mm (3/4" x 1.5") U-channels
4. 22 mm (7/8") metal furring channels, perpendicular to U-channels
5. 75 mm (3") thick fiberglass batts in cavity
6. 2 layers of 16 mm (5/8") Type X gypsum board

Test Setup

- 100 mm (4") precast concrete slab
- 19 mm (3/4") plywood
- 50 mm (2") isolator Pad-M50, spaced 610 mm (24") o.c.
- 38 mm (1.5") thick fiberglass batts in cavities
- 150 mm (6") precast concrete slab
- Stravilink ICH spring hangers
- 19 mm x 38 mm (3/4" x 1.5") U-channels
- 22 mm (7/8") metal furring channels, perpendicular to U-channels
- 75 mm (3") thick fiberglass batts in cavity
- 2 layers of 16mm (5/8") Type X gypsum board

DISCLAIMER

The documentation prepared by CDM Stravitec (including but not limited to installation guidelines) contain generally accepted procedures for a successful installation of Stravilink ICH-S for acoustically isolated ceiling hanger. Any part of the suggestions presented herein, or other documentation, may be followed, modified, or rejected by the owner, engineer, contractor, and/or their representative(s) since they, and not CDM Stravitec, are responsible for planning and execution procedures appropriate to a specific application. CDM Stravitec reserves the right to alter in part or in whole the documentation prepared as well as any recommendations included. It is the responsibility of the Client (direct or indirect) to ensure they have always the latest documentation and to that effect CDM Stravitec encourage contact with its local representatives to review any project specific modifications to the suggested guidelines prior to the start of the installation on site.

This documentation prepared by CDM Stravitec contains loading information for the Stravilink ICH-S for acoustically isolated ceiling hangers. It should be noted that any loading information contained herein represent the loading information for the Stravilink ICH-S only as supplied to the Client. This information does not in any way represent an indication and/or validation of the load capacity of any other elements not supplied by CDM Stravitec - including but not limited to anchors, hanging wires, threaded rods and framing elements for the acoustical ceiling and/or supported elements.

This information is accurate to the best of our knowledge at the time of issue. Information, data and recommendations provided are based on industry accepted testing and prior product usage. It is intended as descriptive of the general capabilities and performance of our products and does not endorse applicability for any particular project. We reserve the right to change products, performance, and data without notice. This document replaces all information supplied prior to the publication hereof.
